Re: Engineered As-Built

Effective July 1, 2016 all new construction served by an on-site subsurface sewage disposal system located in the towns of Cheshire, Prospect and Wolcott will be required to submit an engineered as-built. The as-built must contain the home, sewer exit location from the building, sewage system access points (tank clean-out, distribution boxes, ect) and the leaching system ends. The as-built drawing must be drawn to scale.

The health district will still require a full inspection of the installation of the septic which includes checking elevations. We welcome joint inspections between the engineer and our sanitarians to insure timely issuing of required permits.

*To our local builders ~
